

# I reverse-engineered the **case interview**.

Into an AI that grills you exactly like the real thing.

I'd use a profitability framework – revenue and costs. Where should I start?

ASH · EM AT BAIN

“That’s the textbook. What’s your hypothesis on what’s actually **broken** — revenue or cost, and why?”

WHAT IT ACTUALLY IS

---

# A full mock case interview — with an AI that acts like a **real interviewer**, not a chatbot.

You talk, it grills you, it scores you, and it shows you how a top candidate would've done it. Free.

CASE PROMPT — CLICK TO EXPAND

\* Welcome, and thank you for joining us today. I'm Ash, Engagement Manager at Bain & Company. InvestCo is considering expanding into precious metals investments, with projected sales of \$150MM in year 1 doubling each year for the next three years, and they've hired us to provide guidance on this decision. How would you approach this investment opportunity?

I'd use a profitability framework – revenue minus costs. I'd look at price and volume on revenue, and fixed and variable on costs. Where should I start?

\* That's the textbook. What's your hypothesis on what's actually broken here – revenue side or cost side, and why?

Ask the interviewer...

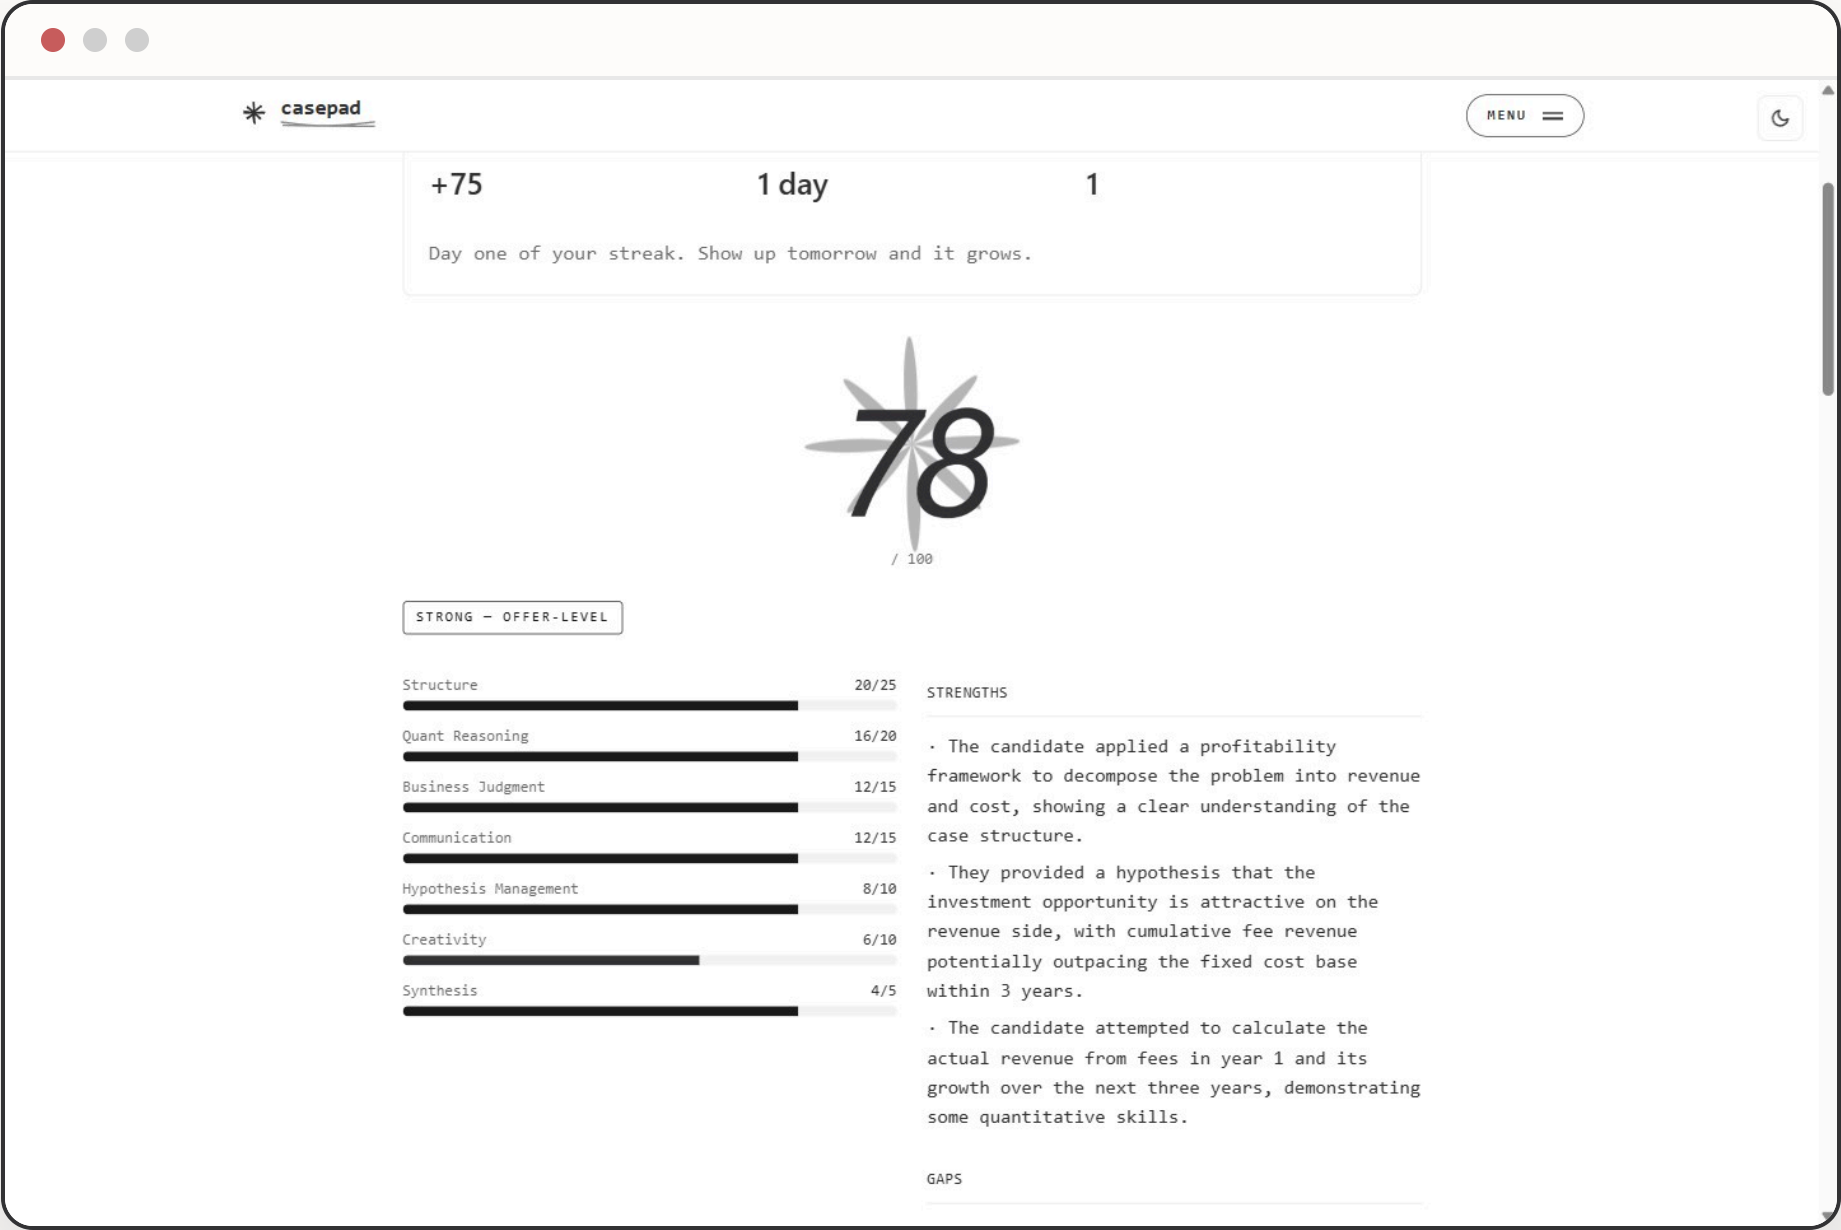

Send

▶ SESSION STUCK OR BROKEN? RESET.

It asks the case, pushes back on weak answers, makes you defend every number, and won't hand you data until you ask the right question – drawing your **issue tree** as you think.

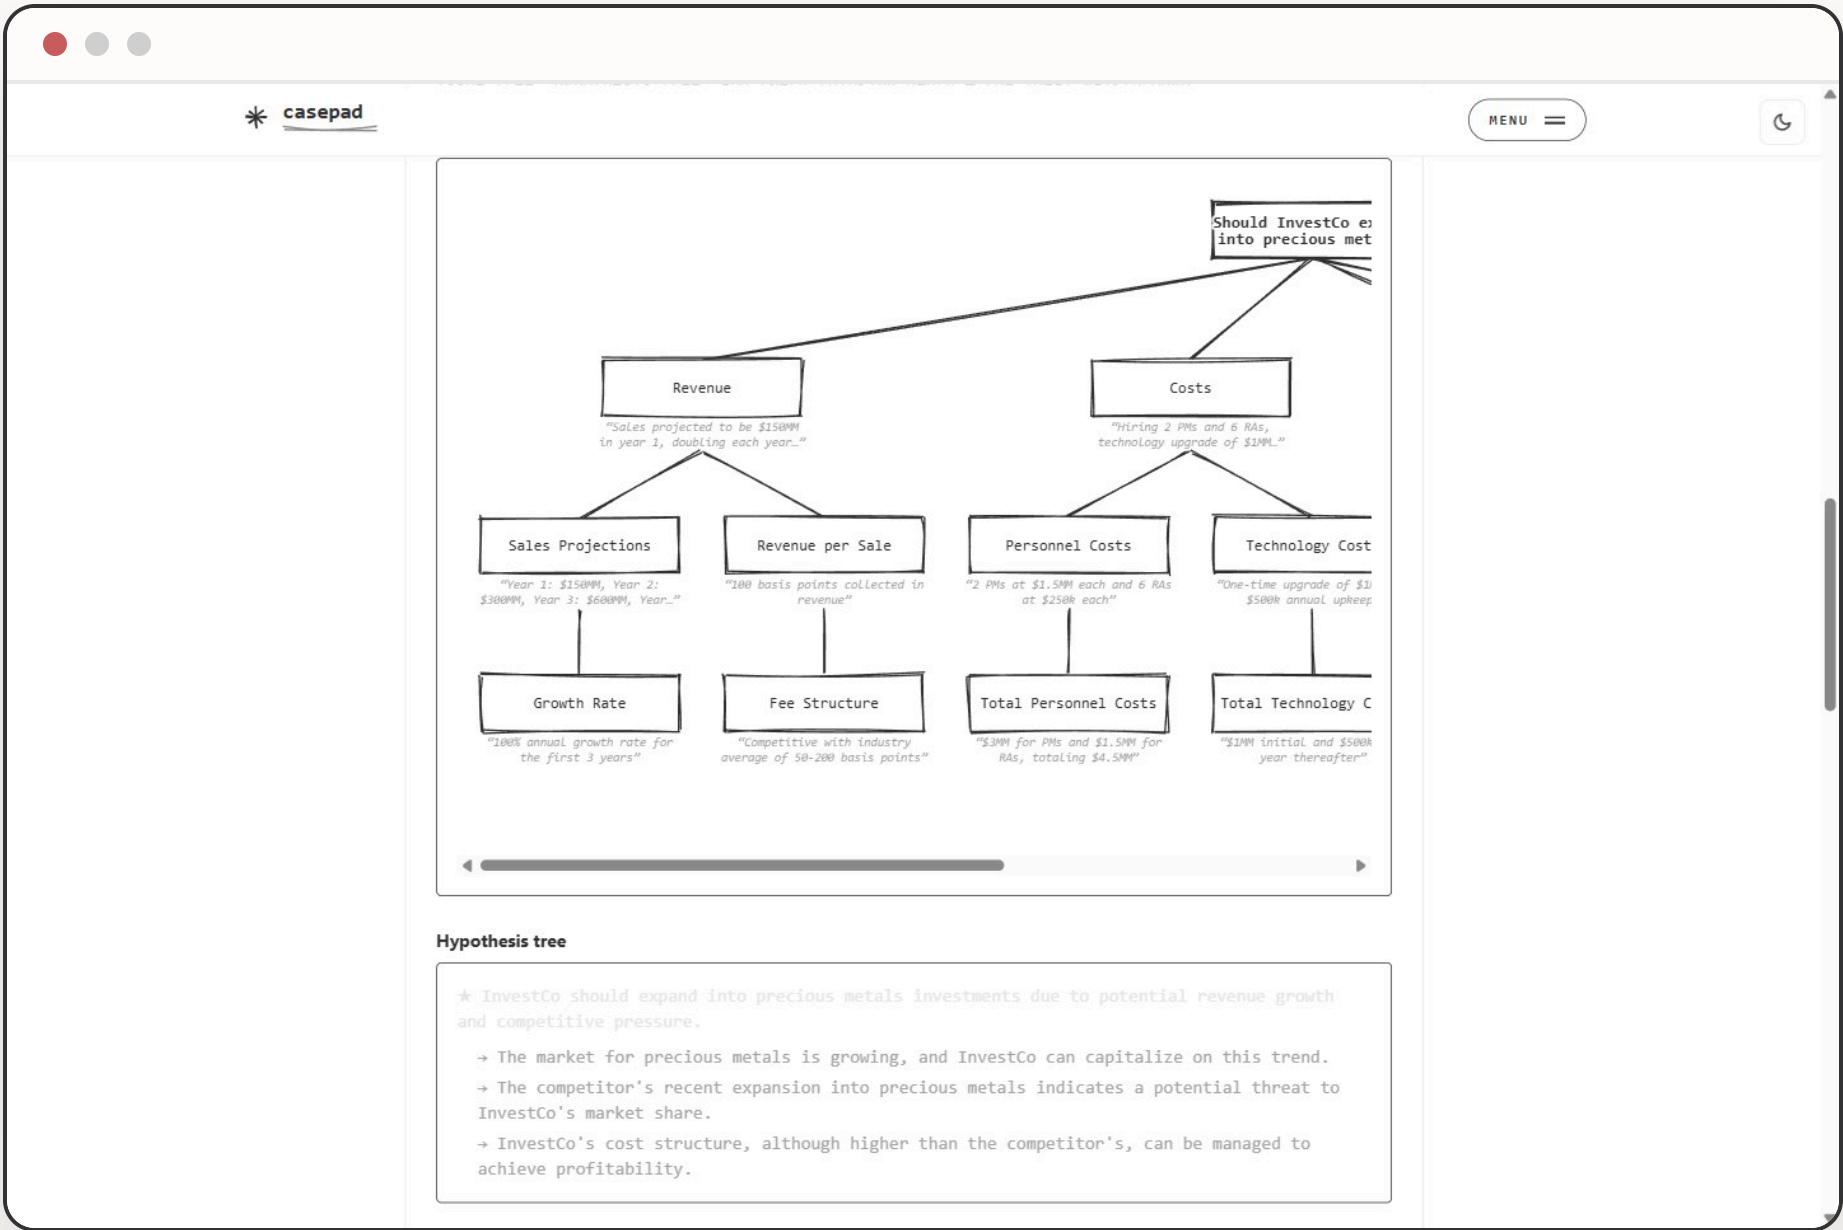

THEN IT GRADES YOU – HONESTLY

A real score the second you finish – on **structure, math, and judgment** – with the exact gaps that would've cost you the offer. The truth you usually only get *after* the rejection email.

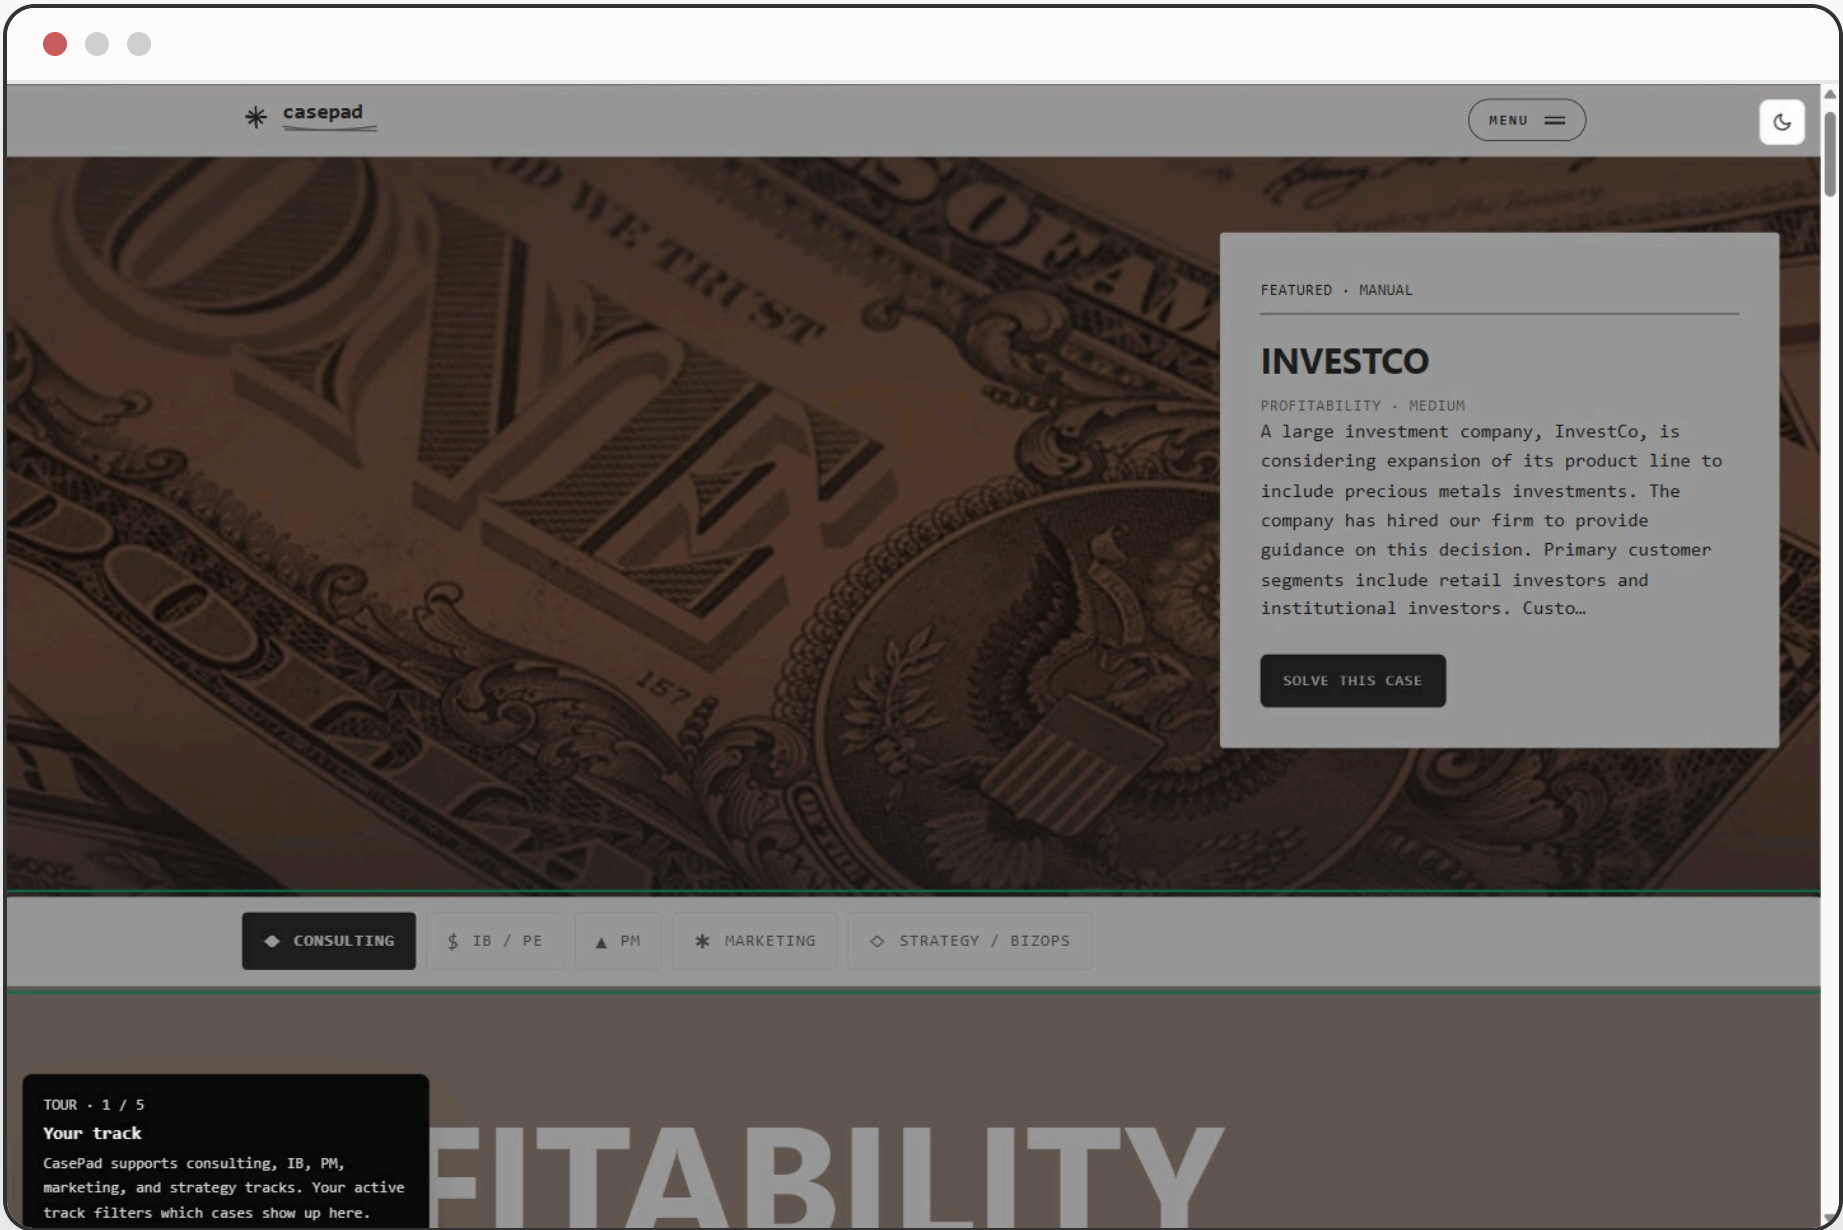

AND SHOWS YOU THE PERFECT ANSWER

Exactly how a **top candidate** would've cracked it – the full issue tree, the hypotheses, and the step-by-step – so you learn what “brilliant” looks like.

AND THERE ARE THOUSANDS

2,600+ real cases across 5 tracks – consulting, product, finance, marketing, strategy. Real cases from the real world – not AI-invented ones.

“BUT CAN’T I JUST USE CHATGPT?”

---

# ChatGPT has already **read the answer.**

Paste a case into ChatGPT and it’s seen the solution – so it can’t make you earn the data, it won’t push back, and it’ll tell you you’re brilliant.

CasePad hides the answer, makes you earn every fact, and is built from how real interviews actually run. It behaves like the **room** – not the cheat sheet.

IT'S LIVE. IT'S FREE.

**Go try to break it.**
